Address

Section    3            Block                    Lot

Gentlemen:

We are making application for replacement, repair, and/or recovering of existing siding at

We will install new siding in place of wood clapboard. This siding will match existing except for material.

We also agree not to change or eliminate any architectural feature. Where replacements are necessary, new construction will match the approved original (this refers to ornament, railings, cornices, columns, etc.)

New siding will be properly backed and applied according to the rules of good practice.

We agree to submit sample of material for approval if other than CLAPBOARD is intended before starting installation. If aluminum siding is to be used proper grounding will be installed as per state and village requirements.

Workmen's Compensation Certificate and Nassau County License has been submitted herewith.

Very truly yours.
